

March News

Grade 7

Mr. Cole

Time flies when you're having fun. We must be having fun. The year closes rapidly after March Break.

Academic Activities

We have had a very busy time of late. All students produced a 30 – 60 second Public Service Announcement on a topic of societal importance. They were quite entertaining. The grade sevens constructed popsicle stick bridges. They supported loads from one to ten times their own mass!

In Language, we will be choosing our own, approved novels to complete an 8-Box assignment custom built for the needs of our class. We will be organizing our writing to compare and persuade.

Having just completed work in Geometry, we'll return to Number Sense and Numeration to begin work with fractions, ratios, and percent.

The focus in Science is Substances and Mixtures. In History, we will continue to learn about New France.

In Physical Education, we will complete a 21 tournament before displaying some moves in dance.

Most students completed an impressive poster for their bedroom walls in art and we'll be creating and performing group skits in Drama.

Special Activities

A jaunt to Brock University will give us an opportunity to swim in the winter, swing on a rope, or try a high dive. It promises to be a fun beginning to the March Break (12 – 16).
