

Nov., Dec., Jan., and now..... February News

Hello Parents and Guardians! I hope your 2018 has been wonderful thus far. Thank you for all the kind gestures in December. I hope you and your families spent time together and made the best of it.

Students have been working well to understand fractions in math. Adding, Subtracting, Multiplying, and Dividing fractions with and without common denominators. Its considered a review from grade 7, the new questions deal with order of operations while working with fractions. That seems to be quite challenging.

In science class, students are understanding mechanical advantage by building a roller coaster track out of popsicle sticks. I'll take some pictures and send them over Remind.

History will be a thing of the past in grade 8. We move on to Geography in a week. Students will not see history again until grade 10.

Students are reminded to bring gym clothes every day. We usually have gym in the morning, and this will make the rest of the day smell peachy.

If you have any questions, comments, or concerns, please feel free to contact me over Remind, or call me at the school.

Sincerely, Mr. J. Sharpe
