

Dear Parent (s)/ Guardian (s)

This last month we were working on many exciting things!

Literacy- In January we were working on procedural writing. The students learned how to give step by step instructions on how to complete a specific task. We began the month by describing the steps involved in eating an Oreo cookie. The students were then able to choose a task in which they were an expert at and the steps involved in completing it. This upcoming month we will be working on making connections with the texts that we are reading.

Math- This past month we have been focusing on Number Sense. Following the break we learned about fractions. We worked on making equal parts and what those parts are called. We recently just finished working on division. We took part in many activities where we divided a whole into equal parts, using both concrete materials and pictures. Our focus now has turned to multiplication. We have many fun activities coming up that we will be doing to develop an understanding of this operation.

Science- The past month we have been working through our science unit called Air and Water in the Environment. We have taken part in many exciting experiments which have taught us the properties of air. We have recently moved on to water and will be discussing how we use water, the water cycle and conservation of water.

Exciting News

Congratulations to both of our January winners at our Leader of the Pack Assembly.

Sierra Morris-Graham won our Responsibility Award.

Mackenzie Minor won our Academic Award.

Upcoming Dates

Feb. 12th- Leader of the Pack Assembly
