Disclaimers:

- The Ministry's reporting template has transitioned from reporting data in kilowatt hours for electricity (kWh), cubic meters for natural gas (m³), and liters for Propane (L), to Gigajoules (GJ) for all energy types. Conversion from GJ for both Natural Gas and Propane to equivalent kWh (ekWh) was completed using the conversion factors included in Energy Star Portfolio Manager's "Thermal Energy Conversions – Technical Reference".
- While efforts were made to provide the most accurate data possible, due to the frequency of meter reads estimates from our primary natural gas service provider we cannot guarantee that the natural gas data for this period will remain unchanged in future reports.
- Rainham Central PS, Brantford Central, Elgin Avenue, and Grandview PS had annual natural gas consumption values well below what would be expected so estimates were created based on previous year's data. These estimates were put in place to minimize the impact these outliers could have on the overall trend of energy consumption.
